

Countywide Active Transportation Plan (CATP)

PLAN
FORWARD

RECONNECT ROCHESTER'S 2026 HOPES AND ASKS FOR BETTER MOBILITY

- Advocate to towns to **adopt safe traffic systems approaches and complete streets designs** in local, county and state road project efforts, including adopting **25 MPH safe speeds for local streets, adding sidewalks, crosswalks, leading pedestrian intervals, RRFBs, curb bump-outs and transit stop amenities such as shelters and benches.**
- Aligned with your vision, invest in the **Countywide Active Transportation Plan (CATP) bicycle network and advocate for more cycling facilities on state roads.**
- Consider a future **Countywide Vision Zero commitment to eliminate traffic fatalities and serious injuries** in Monroe County. Building on the success of **Bus Patrol**, evaluate **automated speed camera enforcement** options the county can coordinate on behalf of towns and villages to hold drivers accountable, and consider **installing intelligent speed limiter technology** to prevent unsafe speeds in County-owned vehicles.
- Continue to expand **driver education, bike education, and traffic safety initiatives** such as the STOP-DWI program, drive2Bbetter campaign and the Community Traffic Safety Team (CTST).
- Contribute funding to **regional trail maintenance and upgrades** coordinated amongst towns.
- Use your platform to actively support **investments in public transportation** to facilitate job access and healthcare access, **incentivizing building housing and other new facilities along existing transit routes** (transit supportive development) through COMIDA or other county programs support.
- Direct the County HR department to explore **RTS U-Passes, protected bike storage, and e-bike rebates** that will encourage County employees to **choose multimodal, car-lite ways to commute to work.**
- Use your influence to urge implementation of the Intermodal Station Phase II project (construction of new intercity bus terminal) as quickly as possible.
